

Microsoft Implementation Group (MIG)

Briefing for DCSS

Fall 2003

By Marc DeBonis

What is the MIG?

- Personnel
 - Marc DeBonis (Sr. Systems Architect)
 - Zeb Bowden (Systems Architect/Developer)
 - Steve Warrick (Data Curator/Developer)
- Tasks
 - Act as a liaison between Microsoft and University IT
 - Administrate root VT Active Directory (Hokies)
 - Develop Opensource tools to promote scalability, stability and security of Windows OSes in .edu environment

AD update

- Stats
 - 16 child domains in AD
 - 164 organizational units in root
 - 4691 users in root
 - 7213 contacts in root
- Hokies Self-Service (<http://selfservice.w2k.vt.edu>)
 - Allows auto-creation of full user accounts and much more
- OU admin (<http://ouadmin.w2k.vt.edu>)
 - Allows sub-administration of Hokies accounts and more
- ED->AD Synch
 - Creates contact objects in AD for faculty/staff automatically
 - Updates select attributes from ED, including mail stop
 - Now synching every 30 minutes
 - Access demographic information via GAL\Outlook Address Book or Start->Search->For People on a workstation that is a member of AD

AD update (cont.)

- Co-location underway
 - New root AD DC being installed in Cassell
 - Will host DDNS and GC (other FSMOs?)
 - Will prevent Hokies login failures to workstations if AISB DCs are unavailable
 - Adds redundancy and speed to other AD-related tasks
- Notice will go out when new ip needs to be added to W2K/XP clients' DNS entries
- ETA 11/1

Security update

- Had been doing proactive scanning every Monday
 - Scanning 198.82.x.x, 128.173.x.x
 - Difficult to exclude specific ranges with current tools
 - Scanning for Messenger vulnerability
 - Lack of MS03-043 hotfix
 - 1892 unpatched systems as of 10/20
 - Scanning for RPC/DCOM vulnerability
 - Lack of MS03-026 and MS03-029 hotfixes
 - 753 may be vulnerable as of 10/20
 - Scanning for Trojan ports open
 - Open ports: 69, 707, 4444
 - 182 probably trojaned as of 10/20
- Results were emailed to CIRT and NLs
- PLEASE update your DNS host records!

Security update (cont.)

- EOL step 1: (completed Aug 1st)
 - Removed NT 4.0 trust relationships
 - Increased RestrictAnonymous to level 2
 - Significantly reduced account lockouts due to username/password guessing
- EOL step 2: (was scheduled Nov 1st - TBD)
 - Disable LM authentication
 - WILL affect Windows 9x and Mac OS 9 systems
 - Biggest concern is Outlook/Exchange usage
 - Remove LM hashes from user accounts
 - Force expire passwords that fail complexity test

MIG Opensource

- New website: <http://opensource.w2k.vt.edu>
- Online since April 28,2003
- Daisy v2.1
 - 938 downloads since v2.1
- Portinator beta 1
 - 3 downloads since 10/22
- Hokies Self-Service v2.3
 - 24 downloads
- OU Admin v1.0
 - 17 downloads
- AuthAD v1.2
 - 8 downloads

MIG Opensource (cont.)

- Daisy downloads from
 - Indiana University
 - USC
 - CMU
 - JMU
 - University of Miami
 - University of Akron
 - US Army
 - FOX Sports
 - TechTV
 - Mattel
 - National Archives and Library of Canada
- HSS & OUadmin from
 - Georgetown University
 - Iowa State University
 - University of Notre Dame
 - Wilmington College
 - Hollins University
 - University of Michigan
 - Saint Louis University
 - Wellesley College
 - Delft University
 - Central Michigan University
 - NC State

Other projects

- Medium Facilities Management – MFM
 - Next option in University Services
 - Will provide pushed security GP, IPSEC, hotfixes, etc
- Mac OS X 10.3 integration
 - Act as authenticated workstations to AD
 - Address book securely queries to AD
 - iCal, iSync provide some mechanisms into Exchange/AD
- Internal: IVY, DAD, HADSS, SafetyNet
- MS betas: MACS, MBSA, VSrv, W2K3 sp1

Linkage

- W2K <http://www.w2k.vt.edu>
- MIG <http://vtmig.w2k.vt.edu>
- MIG Opensource <http://opensource.w2k.vt.edu>
- VT Windows User's Group <http://vtwug.w2k.vt.edu>
- Hokies Self-Service <http://selfservice.w2k.vt.edu>
- OU Admin <http://ouadmin.w2k.vt.edu>
